CONTRIBUTE TO AN OPEN SOURCE PROJECT

The screenshot shows the GitHub repository page for Microsoft/vscode. The 'Issues' tab is selected, displaying a list of open issues. A search filter 'is:issue is:open label:"good first issue"' is applied. A red arrow points to the issue titled 'Save Git uncommitted commit message (on reload/reopen)' which is labeled 'good first issue'.

Microsoft / vscode

Women's Javascript Study Group

Hosted by Katie Jen

NOTE: This meetup, on the 24th, will feature a talk by Elise Olivares, a software engineer who helped build an awesome real-time collaborative text editor. Look below for details on the talk. Overview: I'm a group of women who want to learn JavaScript together. We welcome people of all levels. Beginners are especially encouraged. You move at your own pace in this group, so it doesn't matter if you are a fast or slow learner, or if you attend eva...

Post of OCTOBER 30, 2017 by LEA VEROU

I often run into this issue where I want a different URL remotely and a different one locally so I can test my local changes to a library. Sure, relative URLs work a lot of the time, but are often not an option. Developing **Mavo** is yet another example of this since Mavo is in a separate repo from **mavo.io** (its website) as well as **test.mavo.io** (the test suite). I can't just have relative URLs to it that also work remotely. I've been encountering this problem way too frequently pretty much since I started in web development. In this post, I'll describe all solutions and workarounds I've used over time for this, including the one I'm currently using for Mavo: Service Workers! [Continue reading →](#)

The Ultimate Guide to Headless CMS

• JANUARY 19, 2018 | SPONSORED

The World Has Changed—So Must the CMS

Having a responsive website is no longer enough. Your audience expects a seamless and personalized customer experience across all their devices—the age of headless technology is rising.

Headless CMS is the next generation in content management for brands that want to stay ahead of the curve by engaging customers through a variety of channels.

Download The Ultimate Guide to Headless CMS now for a deep look into what headless CMS is, and why it should be at the top of your list when choosing a new CMS.

Introducing Mavo: Create web apps entirely by writing HTML!

Post of MAY 16, 2017 by LEA VEROU

Today I finally released the project I've been working on for the last two years at **MIT CSAIL**: An HTML-based language for creating (many kinds of) web applications without programming or a server backend. It's named Mavo after my late
